OBJECTIVE

I am an Oracle certified Software Developer capable of back end or full stack development. I am currently seeking a software development position.

SUMMARY

I am a Java Developer with 2 years of experience in Development and 2 years experience in Systems Administration. I am currently studying at The Skill Distillery to further my knowledge of Java, HTML, CSS, Spring, Maven, Bootstrap, JSP, SQL, Angular and JavaScript. I work well in a team environment and alone. I am able to prioritize and self-motivate to accomplish assigned goals and take initiative to resolve potential problems before they occur. I am a quick study and quickly gain understanding of new systems and concepts.

EXPERIENCE

Software Developer   August 2016 -Present
Github
Personal Website

I am currently polishing my craft(Full Stack Development) at the Skill Distillery. I have developed several applications using Java, AWS, JSP, Spring, HTML, CSS, and BootStrap including but not limited to, a 'Presidents' WebApp that based off a csv file, reads, parses, and gives the info into a JSP webpage and makes it searchable. That project and many others I am currently working on can be seen on my on my website with the link above.

System Administrator/Software Developer .   February 2016 – April 2017
Meridian Asset Services, St Petersburg FL
- Strong knowledge of OOP.
- Developed several applications using my knowledge of Java, AWS, JSP, and Spring MVC, and PowerShell.
- Using Java, I developed an application that would separate large Pdf files into individual page files which saved the company time, money, resources.
- Responsible for the maintenance and support of all infrastructure and support systems. This includes end user support and the installation, maintenance and support of computers, servers, software, peripherals, telecommunications equipment, network switches, and routers.
- Administered, and maintained Windows Servers 2008/2012, Active Directory.
- Created and built desktops to user's required criteria.
- Provide technical assistance and support for 120 users with incoming queries and issues related to computer systems, software, and hardware.

Army   February 2004 – February 2012

Skills
